Lab- More Terraform Modules in Azure

```
vijayagagla@DESKTOP-FP4OP26:~/Azure/tf-mod-reusable$ terraform apply

Terraform used the selected providers to generate the following execution plan. Resource actions are indicated with the
following symbols:
  + create

Terraform will perform the following actions:

  # azurerm_resource_group.rg_demo will be created
  + resource "azurerm_resource_group" "rg_demo" {
      + id       = (known after apply)
      + location = "eastus"
      + name     = "rg-reuse-mod-lab-vijaya"
    }

  # module.my_network_bundle.azurerm_subnet.subnetA will be created
  + resource "azurerm_subnet" "subnetA" {
      + address_prefixes                              = [
          + "10.10.1.0/24",
        ]
      + default_outbound_access_enabled               = true
      + enforce_private_link_endpoint_network_policies = (known after apply)
      + enforce_private_link_service_network_policies  = (known after apply)
      + id                                            = (known after apply)
      + name                                          = "frontend-subnet"
      + private_endpoint_network_policies             = (known after apply)
      + private_endpoint_network_policies_enabled     = (known after apply)
```

```
Plan: 4 to add, 0 to change, 0 to destroy.

Do you want to perform these actions?
  Terraform will perform the actions described above.
  Only 'yes' will be accepted to approve.

  Enter a value: yes

Topology | Properties | Capabilities (5) | Recommendations | Tutorials

DDoS protection
Configure additional protection from distributed denial of service attacks.
Not configured

Azure Firewall
Protect your network with a stateful L3-L7 firewall.
Not configured

Peerings
Seamlessly connect two or more virtual networks.
Not configured

Microsoft Defender for Cloud
Strengthen the security posture of your environment.

Private endpoints
Privately access Azure services without sending traffic across internet.
Not configured
