Topology | Properties | **Capabilities (5)** | Recommendations | Tutorials

DDoS protection
Configure additional protection from distributed denial of service attacks.
Not configured

Azure Firewall
Protect your network with a stateful L3-L7 firewall.
Not configured

Peerings
Seamlessly connect two or more virtual networks.
Not configured

Microsoft Defender for Cloud
Strengthen the security posture of your environment.

Private endpoints
Privately access Azure services without sending traffic across internet.
Not configured

Use public IP addresses for public connections to Azure resources

Associate and configure public IP addresses to various Azure resources Learn more.

Associate to a resource
Associate your public IP address to an Azure resource such as an Azure Load Balancer or a network interface.
Associate IP

Configure a public IP address
Configure a DNS idle time, name, and alias record for your public IP address.
Configure

Protect IP address
Choose the right DDoS protection level for your IP address.
Protect
