Lab- Provision Infrastructure using Terraform in Azure

```
vijayagagla@DESKTOP-FP4OP26:~/Azure/terraform-lab$ terraform apply

Terraform used the selected providers to generate the following execution plan. Resource actions are indicated with the
following symbols:
  + create

Terraform will perform the following actions:

  # azurerm_linux_virtual_machine.vm_demo will be created
  + resource "azurerm_linux_virtual_machine" "vm_demo" {
      + admin_username                                       = "adminuser"
      + allow_extension_operations                           = true
      + bypass_platform_safety_checks_on_user_schedule_enabled = false
      + computer_name                                        = (known after apply)
      + disable_password_authentication                      = true
      + disk_controller_type                                 = (known after apply)
      + extensions_time_budget                               = "PT1H30M"
      + id                                                   = (known after apply)
      + location                                             = "eastus"
      + max_bid_price                                        = -1
      + name                                                 = "vm-tf-lab-vijaya"
      + network_interface_ids                                = (known after apply)
```

```
Plan: 5 to add, 0 to change, 0 to destroy.

Do you want to perform these actions?
  Terraform will perform the actions described above.
  Only 'yes' will be accepted to approve.

  Enter a value: yes
